5) Estimated total project cost: \$1,434,343.00
a. Are any federal funds involved?: No
b. Does this project involve a building?: No
c. Is this part of a larger plan for construction on or appurtenant to the property that is subject to this project?: No
d. Are there any other Public Works Wage Decisions related to this project?: No
e. What is the ultimate purpose or functional use of the construction once it is completed?: Municipal Solid Waste Landfill Cell for disposal of trash.

6) Classifications of Construction:

Classification Type and Cost Total	Description
Heavy Engineering (H) Cost: \$1,434,343.00	Municipal Solid Waste Landfill Cell Construction (Cell 4B), consisting of excavation of approx. 50kcy of subgrade excavation, then installation of a geosynthetic liner system consisting of a geosynthetic clay liner (GCL), 60 mil thick HDPE liner, overlain by a 12 oz/sy geotextile. A 2-foot-thick liner protection soil layer will be installed overlying the geosynthetic liner system. The Cell 4B liner system will be tied into the existing Cell 4A liner system. Additional construction tasks include installation of an approximately 500-foot long, 12-foot high trash fence to mitigate blowing trash and keep it on-site.
