c. Is this part of a larger plan for construction on or appurtenant to the property that is subject to this project?: No  
d. Are there any other Public Works Wage Decisions related to this project?: No  
e. What is the ultimate purpose or functional use of the construction once it is completed?: The purpose of this project is to improve the efficiency and reduce long term maintenance of existing irrigation/ditch infrastructure needed to deliver irrigation flow to farms.

6) Classifications of Construction:

Classification Type and Cost Total	Description
<b>Highway/Utilities (A)</b> <b>Cost: \$100,146.00</b>	The project involves the construction of a cast in place (CIP) concrete headwall for an irrigation pipeline intake structure; and, the installation of approximately 245 linear feet of 36 inch diameter HDPE pipe, including fittings and end sections, and excavation and backfill of the pipeline trench. The pipeline will be installed into an existing earth lined irrigation ditch.
