c. Is this part of a larger plan for construction on or appurtenant to the property that is subject to this project?: No
d. Are there any other Public Works Wage Decisions related to this project?: No
e. What is the ultimate purpose or functional use of the construction once it is completed?: Decommission abandoned lagoons and place sludge in landfill.

6) Classifications of Construction:

Classification Type and Cost Total	Description
Highway/Utilities (A) Cost: \$1,130,678.53	The Pecos WWTP Lagoon Abandonment Plan consists of earthwork, as well as demolition and disposal of sludge material. The selected bidder will be responsible for the temporary removal of all sludge from the Lagoons. The bids for this project will be evaluated on the total cost for the Base Bid + Additive Alternate A. Any off-site hauling/disposal will require coordination with the property owner as shown in the plans. Base Bid: The base bid for this project consists of the removal of 860 Cubic yards of sludge from Lagoon #2. All sludge will be removed from the lagoon and disposed in a landfill licensed to accept the material. All sludge must pass the paint filter test prior to delivery to the landfill. Additive Alternate A: The base bid for this project consists of the removal of 4436 Cubic yards of sludge from Lagoon #3. This additive alternate is broken into lots, with the intent to remove as much sludge as possible within the project budget. All sludge will be removed from the lagoon and disposed in a landfill licensed to

accept the material. All sludge must past the paint filter test prior to delivery to the landfill.

Additive Alternate B: This alternate includes 3817 Cubic Yards of grading in Pond 3. The pond liner in Pond 3 shall be removed and disposed of at an appropriate landfill. The pond bottom shall be graded such that there is no pooling to ensure positive drainage within the lagoon area.

Additive Alternate C: This alternate includes 4910 Cubic Yards of grading in Pond 2. The pond liners shall be removed and disposed of at an appropriate landfill. The contractor shall remove all structures within the lagoons, including the lagoon aerators and associated wiring and any piping, as well as the concrete aerator removal structure and crane; the Existing concrete Chlorination Box will be removed as well. The pond bottom shall be graded such that there is no pooling to ensure positive drainage within the lagoon area.
