Wage Decision Approval Summary

1) Project Title: Re Bid - Hazard Mitigation and Stabilization of Sewer Lines
Requested Date: 01/11/2022
Approved Date: 01/12/2022
Approved Wage Decision Number: LI-22-0073-A

Wage Decision Expiration Date for Bids: 05/12/2022

2) Physical Location of Jobsite for Project:
Job Site Address: Rio Ruidoso River
Job Site City: Ruidoso
Job Site County: Lincoln

3) Contracting Agency Name (Department or Bureau): Village of Ruidoso
Contracting Agency Contact's Name: Karen Gutierrez
Contracting Agency Contact's Phone: (575) 258-4343 Ext. 1016

4) Estimated Contract Award Date: 03/08/2022

5) Estimated total project cost: \$20,000,000.00
a. Are any federal funds involved?: Yes - \$20,000,000.00
b. Does this project involve a building?: No
c. Is this part of a larger plan for construction on or appurtenant to the property that is subject to this project?: No
d. Are there any other Public Works Wage Decisions related to this project?: No
e. What is the ultimate purpose or functional use of the construction once it is completed?: The purpose is to mitigate future hazard from major storm events by protecting the sanitary sewer line from river erosion, degradation, and meander. There will be 39 sites, along 12 miles of the Rio Ruidoso. Project work will include excavation of river and adjacent areas, downstream of sewer line river crossings and along the banks of the Rio Ruidoso. Scope of work for the existing sewer line includes installing new flood and structural encasement to protect the sewer line; lowering and encasing the sewer line; installing grouted boulder grade control structures, grouted boulder bank protection, scour walls, and dumped river rock boulder channels to protect the sewer line; and protecting the river bank and manholes with stabilization and armoring. New sewer line sections, manholes, and encasement will also be installed. Additionally, the project will also include stream bank restoration, reseeding and planting of disturbed areas after construction.

6) Classifications of Construction:

Classification Type and Cost Total	Description
Highway/Utilities (A) Cost: \$20,000,000.00	The purpose is to mitigate future hazard from major storm events by protecting the sanitary sewer line from river erosion, degradation, and meander. There will be 39 sites, along 12 miles of the Rio Ruidoso. Project work will include excavation of river and adjacent areas, downstream of sewer line river crossings and along the banks of the Rio Ruidoso. Scope of work for the existing sewer line includes installing new flood and structural encasement to protect the sewer line; lowering and encasing the sewer line; installing

grouted boulder grade control structures, grouted boulder bank protection, scour walls, and dumped river rock boulder channels to protect the sewer line; and protecting the river bank and manholes with stabilization and armoring. New sewer line sections, manholes, and encasement will also be installed. Additionally, the project will also include stream bank restoration, reseeding and planting of disturbed areas after construction.
